

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.(original) An embolization device for embolizing a vessel cavity *in vivo*, the embolization device comprising a biological response modifier (BRM).

2. (original) An embolization device for embolizing a blood vessel, the embolization device comprising a BRM.

3. (original) An embolization device for embolizing a aneurysm formed in a blood vessel, the embolization device comprising a BRM.

4.(currently amended) The embolization device according to ~~any one of Claims Claim~~ Claim 1 ~~to 3~~, wherein the BRM is applied by coating to a surface of the embolization device.

5. (currently amended) The embolization device according to ~~any one of Claims Claim~~ Claim 1 ~~to 3~~, wherein a polysaccharide is applied by coating to a surface of the embolization device.

6. (currently amended) The embolization device according to ~~any one of Claims Claim~~ Claim 1 ~~to 3~~, wherein chitin is applied by coating to a surface of the embolization device.

7. (currently amended) The embolization device according to ~~any one of Claims Claim~~ Claim 1 ~~to 3~~, wherein chitosan is applied by coating to a surface of the embolization device.

8. (currently amended) The embolization device according to ~~any one of Claims Claim 1 to 3~~, wherein a $\beta(1\rightarrow3)$ glucan is applied by coating to a surface of the embolization device.

9. (currently amended) The embolization device according to ~~any one of Claims Claim 1 to 3~~, wherein curdlan is applied by coating to a surface of the embolization device.

10. (currently amended) The embolization device according to ~~any one of Claims Claim 1 to 3~~, wherein a $\beta(1\rightarrow3)$ glucan having a branch comprising a $\beta(1\rightarrow6)$ glucan is applied by coating to a surface of the embolization device.

11. (currently amended) The embolization device according to ~~any one of Claims Claim 1 to 3~~, wherein lentinan is applied by coating to a surface of the embolization device.

12. (currently amended) The embolization device according to ~~any one of Claims Claim 1 to 3~~, wherein sizofiran is applied by coating to a surface of the embolization device.

13. (currently amended) The embolization device according to ~~any one of Claims Claim 1 to 12~~, wherein the embolization device is a coil.

14. (currently amended) The embolization device according to ~~any one of Claims Claim 1 to 12~~, wherein the embolization device is a coil comprising a metal wire comprising any one of platinum, gold, silver, and tantalum, or an alloy wire containing any one of platinum, gold, silver, and tantalum in an amount of 80% by weight or more.
